Greetings,

I am writing with great enthusiasm to express my keen interest in an IT Professional position at your company. With a solid foundation in Information Technology and Computer Science (NCV Level 4) and Mathematics and Statistics NQF5, complemented by industry-recognized CompTIA certifications (A+, Security+, Server+), I am confident that my technical acumen and proactive approach align perfectly with the requirements of your dynamic IT team. I am currently pursuing a Bachelor of Science in Computing at UNISA.

My practical skills were proven through intensive competitions. At WorldSkills South Africa 2019, I designed complex corporate and IoT networks using Cisco Packet Tracer and managed multi-platform environments through VMware with Linux and Windows Server. At the BRICS Skills Competition 2019 in China, I earned a Bronze Medal, learning Python for data scraping and processing over 2 million records using Tableau.

My career at Mustek Limited demonstrates steady growth across three distinct roles. I began as an Assembly Line Technician(2022-2024), building precision and speed while assembling Jupitors, Desktops, All-in-Ones, Mini PCs, and Gaming PCs. I then moved to IT Technician for Server Assembly & Testing (2024-2026), where I assembled Lenovo and Mecer servers, performed RAID deployment, BIOS/UEFI updates, burn-in testing, OS imaging, and license key injection. I voluntarily assisted colleagues with complex troubleshooting and contributed to Mustek Lenovo receiving a prestigious award from Lenovo SA.

In my current role as IT Technician for Server & Desktop (2026–Present), I manage the complete lifecycle of server units. Doing repairs daily within SLA (90%+ compliance), maintaining a rework rate below 2%, keep the CMDB system updated, configure RAID arrays, conduct burn-in testing, and ensure compliance with OHS, PPE, and ISO standards.

I hold CompTIA A+, Security+, and Server+ certifications and am currently preparing for Network+. My long-term aspiration is to leverage my expertise to foster digital entrepreneurship within my community.

I'm eager to bring my technical skills, dedication to quality, and collaborative spirit to your company. My proven career progression at Mustek, from Assembly Line Technician to Server & Desktop Technician – demonstrates my ability to grow, adapt, and deliver results.

Thank you for considering my application. I have attached my resume for your review and welcome the opportunity to discuss how my qualifications and experience can benefit your team in an interview.

Sincerely,

Mandlenkosi Emmanuel Kubheka
IT Technician (Server & Desktop)
CompTIA A+ | Security+ | Server+ | Network+ (in progress)
